ROBIN BUILDINGS

WHAT SETS US APART?

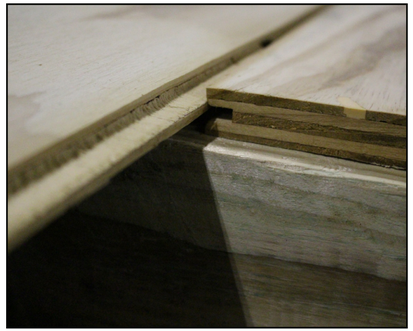

- Family-owned and operated for 52 years
- Designed to last with the best components and industry leading construction
- Customized for you - style, size, and features
- Wood *or* Steel framing
- Financed and delivered by our local dealer network

ROBIN BUILDINGS

HOW TO RECOGNIZE QUALITY CONSTRUCTION:

1 Floor

From solid 4x6 notched skids to quality lumber, your Robin Building is built on a firm foundation, from the ground up.

All pressure treated floor system with 3/4" tongue and groove plywood and 2x6 joists on 16" centers.

3/4" pressure treated plywood floor screwed down.

2x6 floor joists 16" centers lag bolted to skids.

Solid 4x6 skids treated for ground contact and CNC precision milled.

IMAGINE

2 Frame

Your choice of #1 grade wood studs or galvanized steel studs.

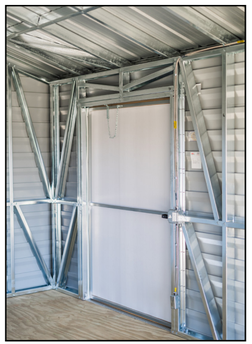

7' wall standard, #1 Grade wood, engineered trusses with steel hat channel roofing support for increased strength and longevity, solid 4x4 or 4x6 door headers, and horizontal blocks between studs for wall strength.

Exterior rated galvanized steel framing with 7' wall standard, diagonal wind braces at each corner, and trussed header over door openings.

3 Siding

Select your siding type and color.

R*Lap Steel siding
Strongest metal siding in our industry, available in 12 colors; provides residential appearance in an impact-resistant, maintenance free exterior.

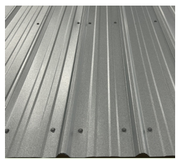

SmartSideTM Panel siding available in any Sherwin Williams™ paint color; provides upgraded wood appearance.

SmartSideTM Lap siding available in any Sherwin Williams™ paint color; produces premium residential appearance.

4 Roofing

Select your roof type and color.

Galvalume Steel
Our standard residential-grade roofing, durable and impact resistant.

Painted Steel
Same strength as galvanized, available in 12 colors.

Architectural Shingles
Long-life shingles to match your home and meet any HOA requirements.
